Acknowledgments

Our work on induced responses has been supported by grants from U.S. Department of Agriculture, National Research Initiative (RK) and the National Science Foundation and Mellon Foundation (IB). Parts of the manuscript were improved by Susan Abrams, Anurag Agrawal, Bob Bugg, Jenny Davidson, Sean Duffey, Greg English-Loeb, Erkki Haukioja, Mike Stout, Jennifer Thaler, John Thompson, Nora Underwood, and Emily Wheeler.

We thank our families for showing patience with us while we were preparing the manuscript. We also thank our respective institutions for granting us sabbatical leaves to work on this book. Finally, RK thanks David and Laurie Hougen-Eitzman for housing and for stimulating conversation during the early parts of this project.
