

Acknowledgment

The editors would like to gratefully acknowledge the generous support of the following contributors from the University of Missouri: the College of Agriculture, Food and Natural Resources, the Molecular Biology Program, the Office of Research, the Interdisciplinary Plant Group, the College of Arts and Sciences, the School of Veterinary Medicine, the Plant Sciences Unit, and the School of Medicine. The contributors continued support made the 23rd Stadler Genetics Symposium a success.

The speakers, who spent a tremendous amount of time preparing their lectures and manuscripts are gratefully acknowledged. Without their expertise and dedication, the Symposium could not have taken place.

We wish to thank all of the local Chairpersons for seeing that all the speakers were well taken care of during the Symposium.

The behind-the-scene and on-site preparations were excellently handles by Jamie Schieber from Conferences and Specialized Courses, University of Missouri, who tirelessly handled all of our peculiar requirements and made sure everything was well organized.

A special thanks goes to Heather Lewandowski and Joanne Beavers, USDA-ARS, Columbia, Missouri, and Christy Trautmann, Iowa State University for all their excellent help in keeping us organized and reminding us of all the things we had forgotten.
