

ACKNOWLEDGEMENTS

Research workshops are different from conferences and seminars in that the participants actually 'do' something and to help them work requires much logistic support. It is, first, a pleasure to thank the Vice-Chancellor of the University of Hong Kong, Professor Y.C. Cheng, for his support of the workshop by providing funds which allowed planning to proceed, boats to be booked and encouraged participants to believe it would take place and, thus, to plan on attending. This grant, supplemented by another from the Croucher Foundation, meant that final planning could proceed. Thanks are also due to those fund-awarding bodies for supporting the aims of the Workshop by providing travel and subsistence grants for the delegates from overseas to attend. Especial thanks are due to the Carlsberg Foundation for funding the participation of Dr J. Knudsen and Dr K. Jensen from Denmark and to the Director and Trustees of the K.C. Wong Education Foundation for funding the participation of Professor Li Fuxue, Professor Zhang Qiaomin, Professor Li Sheng and Dr Ke Caihuan from China.

I am particularly grateful to Mr A.W.Y. Leung, Dr S.F. Leung and Dr K.F. Leung, for planning and organizing the trawling operations. In the administration of the workshop, the staff of the Swire Institute of Marine Science, notably Ms Sylvia S.F. Yiu, Mr James C.T. Hui, Mr Albert C.C. Au, Mr Patrick P.C. Chan, Mr Cheung Ming, Mr K.K. Wong and Ms K.P. Chan were especially helpful and, indeed, were largely responsible for its smooth running. Logistical support was also provided by Dr G.A. Williams of the Department of Ecology and Biodiversity of the University of Hong Kong. I am also grateful to all the students normally working at the institute for their co-operation, particularly in terms of room and bench sharing, which enabled everybody to have, at least, basic facilities.

In the publication of this proceedings, I am grateful to the staff of Hong Kong University Press for their willing assistance with problems faced in publication. Each paper in this proceedings has been refereed prior to publication and I am especially grateful to the following for their important contributions to this aspect of the workshop's research: Professor C. Birkeland (University of Guam, U.S.A.), Dr F.E. Wells (Western Australian Museum, Australia), Professor M. Jones (University of Plymouth, U.K.), Dr D.G. Bird (National Rivers Authority, U.K.), Professor A.J. Kohn (University of Washington, U.S.A.), Dr D. Reid (Natural History Museum, London), Professor J.C. Britton (Texas Christian University, U.S.A.), Professor M. Depledge (University of Plymouth, U.K.), Dr Y. Hanamura (University of Tokyo, Japan), Dr G. Poore (Victoria Museum, Melbourne, Australia), Dr S.Y. Lee (Griffith University, Australia), Professor G. Branch (University of Cape Town, South Africa), Professor J. Knudsen (Zoological Museum, Copenhagen, Denmark), Dr R. Kennish (Environmental Resources Management, Hong Kong), Mr K. Wilson (Agriculture, Fisheries and Conservation Department, Hong Kong), Mr P. Clark (The Natural History Museum, London), Dr W.F.

Rudman (The Australian Museum, Sydney), Dr W.J. Langston (Plymouth Marine Laboratory, U.K.), Mr K.F. Leung (Environmental Protection Department, Hong Kong), Dr D. Holdich (University of Nottingham, U.K.), Professor P.S. Rainbow (The Natural History Museum, London), Dr M.J. Kaiser (University of Wales, Bangor, U.K.), Professor R.F. McMahon (University of Texas, U.S.A.), Professor E. Naylor (University of Wales, Bangor, U.K.), Professor R. Seed (University of Wales, Bangor, U.K.), Dr G. Blackmore (The University of Hong Kong).

Brian Morton
