

Preface

The term 'bios' implying life, is the core for all researches going on, which ultimately make life on earth better and easy. The mathematical parameters of all trials are of paramount importance, as their correlation with similar data is much more fruitful in exploring the causes of the problem. Today technology is gradually forming the base for all ways of research on behalf of its minimal time consumption with excellent results. It helps in working out the effects of the environment on all forms and aspects of life and vice-versa and consequently helps in designing better procedures and remedies from nature, to the problems generated within nature itself by anthropogenic actions.

The present book entitled, "*Bioinformatics, Biotechnology and Bio-remediation*", has been painted on a large canvas with broad strokes comprising 20 chapters by experts and researchers delved in their respective fields covering the subject area. We appreciate the efforts of all the contributors whose prompt response gave us the necessary impetus to conquer the endeavor and publish the proceedings of 18th "All India Congress of Zoology" and National Seminar on "Current Issues on Applied Zoology and Environmental Sciences with Special Reference to Eco-restoration & Management of Bioresources" (SCIAZE) in the stipulated time period.

We express our heartfelt thanks to the patrons and organizers of 18th AICZ & SCIAZE. Sincere patronage, kind cooperation and generous help rendered by Hon'ble the Vice- chancellor and teaching and non-teaching staff of the

University of Lucknow, Lucknow, for making the Congress and Seminar a success, are gratefully acknowledged. Our special thanks are due to the publisher of this volume, Shri Prabhat Kumar Sharma, Managing Director, **M/s Sarup Book Publishers Pvt. Ltd.**, Darya Ganj, New Delhi for his keen interest and dedicated efforts in bringing out the present book well in time.
