

Contents

Preface	
Chapter 1 Biochemical Thermodynamics	32 pages
Chapter 2 $A = P$	48 pages
Chapter 3 Ordered $A + B \rightarrow$ Products	50 pages
Chapter 4 Random $A + B \rightarrow$ Products	50 pages
Chapter 5 $A + B = P + Q$	38 pages
Chapter 6 $A + B + C \rightarrow$ Products	40 pages
Chapter 7 Ordered $O + mR \rightarrow$ Products	24 pages
Chapter 8 Random $O + mR \rightarrow$ Products	20 pages
Chapter 9 Inhibition and Activation of $A \rightarrow$ Products	48 pages
Chapter 10 Modification of $A \rightarrow$ Products	20 pages
Chapter 11 Inhibition, Activation, and Modification of $A + B \rightarrow$ Products	34 pages
Chapter 12 Systems of Enzyme-Catalyzed Reactions	32 pages
References	4 pages
Index	5 pages
