

ACKNOWLEDGMENTS

Michael P. Lesser (Chapter 1) acknowledges the support from various funding agencies including NOAA and NSF for research on coral reef bleaching. Additionally, the Coral Reef Targeted Research (CRTR) Program, a partnership between the Global Environmental Facility and the World Bank provided funding and a challenging environment to explore the underpinnings and ramifications of global climate change on coral reefs around the world.

Research in the Storey laboratory (Carolina A. Freire, Alexis F. Welker, Janet M. Storey, Kenneth B. Storey, and Marcelo Hermes-Lima, Chapter 3) is supported by NSERC Canada; Kenneth B. Storey holds the Canada Research Chair in Molecular Physiology. Brazilian authors thank CNPq, INCT-CNPq Redoxoma, and DAAD (German Academic Exchange Service).

The work presented by Pauline Snoeijs, Peter Sylvander, and Norbert Häubner in Chapter 5 and by Pauline Snoeijs, Norbert Häubner, Peter Sylvander and Xiang-Ping Nie in Chapter 29 was supported by the research grants Formas 21.9/2003-1033, Formas 21.0/2004-0313, and EU Stukturstöd FIV Dnr 231-0692-04.

Nelly Tremblay, Tania Zenteno-Savín, Jaime Gómez-Gutiérrez, and Alfonso N. Maeda-Martínez (Chapter 6) wish to thank C.J. Robinson, the crews of the R/V *El Puma* and R/V *Francisco de Ulloa*, and the graduate students and researchers at ICMYL-UNAM, UABCS, and CICIMAR-IPN for recording hydroacoustic, environmental information, and collecting zooplankton samples; N.O. Olguín-Monroy for technical help in the biochemical analyses, O. Calvario M. for training in the use of the OxyMat2000, and S. Martínez-Gómez, O. Angulo-Campillo, J. R. Morales, H. Urias-Leyva, and J. Cruz for helping to sort out the krill specimens from the zooplankton samples. Nelly was supported by graduate student grants Programa Institucional de Formación de Investigadores (PIFI-IPN) and Secretaría de Relaciones Exteriores. This research was supported by CICIMAR-IPN, CONACYT-FOSEMARNAT (2004-01-144), CONACYT-SAGARPA (S007-2005-1-11717),

CIBNOR (PC2.0, PC2.5, PC2.6), and ICMYL-UNAM (IN219502, IN210622).

Marco A. Liñán-Cabello, Michael P. Lesser, Laura A. Flores-Ramírez, Tania Zenteno-Savín, and Hector Reyes-Bonilla (Chapter 9) would like to thank everyone directly and indirectly involved in the research included in this chapter, too many to be enumerated individually. Research was supported by the Alvarez-Buylla de Aldana Foundation, Universidad de Colima, PROMEP of the Secretaría de Educación Pública, Mexico (Marco), CIBNOR (Tania), and UABCS (Hector).

Work presented in Chapter 11 by Roberto I. López-Cruz, Alcir Luiz Dafre, and Danilo Wilhelm Filho was funded by grants from CONACYT, CIBNOR, and a fellowship from Programa de Estudios de Posgrado (CIBNOR) (to Roberto). The authors wish to thank Marco Antonio Salazar Bermúdez (UABCS) for the artwork.

Mikko Nikinmaa (Chapter 12) is supported by the Centre of Excellence grants from the Academy of Finland and the University of Turku. Max Gassmann and Anna Bogdanova (Chapter 12) are supported by the Swiss National Science Foundation (#320030-125013, #310030-124970 and #310030-124970/1) and by the Zurich Center for Integrative Human Physiology.

Research presented by Tania Zenteno-Savín, José Pablo Vázquez-Medina, Nadiezhda Cantú-Medellín, Paul J. Ponganis, and Robert Elsner (Chapter 13) was funded by grants from ONR, SEMARNAT-CONACYT, CIBNOR (to Tania), OPP 0944220 (to Paul), and fellowships from Programa de Estudios de Posgrado at CIBNOR (to José Pablo and Nadia). José Pablo is currently supported by UC-Mexus, CONACYT and Secretaría de Educación Pública fellowships.

While working on their manuscript (Chapter 14), Alexey A. Sukhotin was supported by Russian Foundation for Basic Research (grant #10-04-00316), Julia Strahl by the German Science foundation (DFG), grant numbers AB124/10-1 and DR262/10-1, and Eva E.R. Philipp by the DFG Cluster of Excellence "The Future Ocean."

The research presented in Chapter 15 by María Luisa Fanjul-Moles and María E. Gonschatt was partially supported by PAPIIT IN-207008 (María Luisa) and by PAPIIT IN-207408 (María Eugenia). María Luisa and María Eugenia thank Julio Prieto-Sagredo for his help with the figures.

Brenda Valderrama, Gustavo Rodríguez-Alonso, and Rebecca Pogni (Chapter 16) were funded by the Executive Program of Scientific and Technological Cooperation Mexico-Italy 2006–2009. Brenda and Gustavo received additional support from the SNI-STUDENTS fund. Brenda and Gustavo acknowledge financial support from CONACYT.

While working on the manuscript Eva Phillip and Philip Rosentiel (Chapter 17) were supported by the German Science foundation (DFG) Cluster of Excellence "The Future Ocean," Eva Phillip and Simone Lipinski by the Cluster of Excellence "Inflammation at Interfaces," and Simone Lipinski by the DFG grant RO2994/5-1 "Reactive oxygen species as modulators and effectors of epithelial defense: A role for Nod-like receptors."

Inna M. Sokolova, Alexey A. Sukhotin, and Gisela Lannig (Chapter 19) the work of Amalia E. Morales, Amalia Pérez-Jiménez, Miriam Furné, and Helga Guderley (Chapter 20) was primarily supported by NSERC of Canada, as well as by DFO, with strong collaborative support from Jean-Denis Dutil of DFO gratefully acknowledge the following programs and organizations for support during the work on this manuscript: NSF awards IOS-0921367 and IBN-0347238 to Inna, Russian Foundation for Basic Research Grant #10-04-00316 to Alexey and the PACES research program of the Alfred Wegener Institute to Gisela.

Volodymyr I. Lushchak (Chapters 21 and 32), Halyna M. Semchyshyn, and Oleh V. Lushchak (Chapter 32) wish to thank Nadia Semchuk who helped with figures and artwork.

José María Monserrat, Rafaela Elias Letts, Josencler L. Ribas Ferreira, Juliane Ventura-Lima, Lilian L. Amado, Alessandra M. Rocha, Stefania Gorbi, Raffaella Bocchetti, Maura Benedetti, and Francesco Regoli (Chapter 23) were supported by funds from the Brazilian agency CNPq (Productivity Research Fellowship) to José and by a grant from the LASPAU/Fincyt Peruvian Research Fund to Rafaela. Josencler and Alessandra are graduate fellows from CNPq and CAPES, respectively. Juliane receives a post-doctoral fellowship from the Brazilian Agency CAPES. The support from CAPES (PROCAD Program, Proc. 089/2007) is acknowledged by Lilian and José.

Matthew B. Grisham (Chapter 24) wishes to thank all current and former students and post-doctoral fellows who contributed greatly to our understanding of the role of reactive oxygen and nitrogen species in acute and chronic inflammation.

Work presented in Chapters 25 (Graziella Eliza Ronsein, Glaucia Regina Martinez, Eduardo Alves de Almeida, Sayuri Miyamoto, Marisa Helena Gennari de Medeiros, and Paolo Di Mascio), 28 (Eduardo Alves de Almeida, Danilo Grunig Humberto Silva, Afonso Celso Dias Bainy, Florêncio Porto Freitas, Flávia Daniela Motta, Osmar Francisco Gomes, Marisa Helena Gennari de Medeiros and Paolo Di Mascio), 30 (Eduardo Alves de Almeida, Glaucia Regina Martinez, and Paolo Di Mascio), 34 (Sayuri Miyamoto, Eduardo Alves de Almeida, Lilian Nogueira, Marisa Helena Gennari de Medeiros, and Paolo Di Mascio), 37 (José Pedro Friedmann Angeli, Glaucia Regina Martinez, Flávia Daniela Motta, Eduardo Alves de Almeida, Marisa Helena Gennari de Medeiros, and Paolo Di Mascio) and 38 (Camila Carrião Machado Garcia, José Pedro Friedmann Angeli, Eduardo Alves de Almeida, Marisa Helena Gennari de Medeiros, and Paolo Di Mascio) was supported by the Brazilian research funding institutions FAPESP (Fundação de Amparo à Pesquisa do Estado de São Paulo), CNPq (Conselho Nacional para o Desenvolvimento Científico e Tecnológico), CAPES (Coordenação de Aperfeiçoamento de Pessoal de Nível Superior), Pró-Reitoria de Pesquisa USP, Instituto do Milênio: Redoxoma and INCT de Processos Redox em Biomedicina – Redoxoma. The authors also thank L'ORÉAL-UNESCO for Women in Science (Sayuri) and The John Simon Memorial Guggenheim Foundation (Paolo) for the fellowships provided.

Betul Catalgol, Stefanie Grimm, and Tilman Grune (Chapter 33) thank COST (B35 and CM1001) for support.

Doris Abele thanks the Alfred-Wegener Institute of Polar and Marine Research in Bremerhaven for supporting her oxidative stress working group and its scientific works in the cold South for many years; and to her colleagues at the AWI, especially Thomas Brey, Christian Wiencke, Fritz Buchholz, and Victor Smetacek for a creative and inspiring working atmosphere. Doris gratefully acknowledges support by German Science Foundation (DFG) throughout her career track, during the time when we worked on the book it was DFGAb124/10-1.

We would like to thank all co-authors for joining this venture and the effort each and every one of you

invested in making this book reality. We appreciate your straightforward cooperation and quick responses to our (sometimes manic) e-mails. We are especially proud of the participation of young authors such as Julia Strahl, Nelly Tremblay, Dorothee Dick, Paula Gonzalez, Laura Flores-Ramirez, Gustavo Rodriguez-Alonso, Josencler Ribas Ferreira, Alessandra Rocha, Juliane Ventura-Lima, Sayuri Miyamoto, Danilo Grunig Humberto Silva, Flávia Daniela Motta, Roberto López-Cruz, and Nadia Cantú-Medellín, who wrote brilliant text passages. Tania and José Pablo wish to thank the so-called *Secta de Estrés Oxidativo* for their patience, support and dedication.

Citlali Guerra, Stefanie Meyer, Michiel Rutgers van der Loeff, and Gerhard Diekmann from the Alfred-Wegener Institute, Bremerhaven, and Kai Bischoff from the University of Bremen, Norma Olguín-Monroy, Patricia Parrilla-Taylor, Paola Tenorio-Rodríguez, Marcela Vélez-Alavez, Vanessa Labrada-Martagón, Ramón Gaxiola-Robles, and

Orlando Lugo-Lugo from Centro de Investigaciones Biológicas del Noroeste (CIBNOR), kindly took the time to review and improve chapters of the book. The photograph in the front cover was taken by Rigoberto Moreno (www.rigobertomoreno.com) in the coast of Nayarit, Mexico. We enormously appreciate Rigo's kind contribution of his artwork for our book.

We dedicate this book to all our students and post-doctoral fellows, past, present and future, who are a continuous source of inspiration, and who make all our efforts worth the while.

As editors, Doris, José Pablo, and Tania acknowledge the support of our home institutions AWI, DFG, CIBNOR, UC-Merced, as well as the funding provided by DAAD, CONACYT, and Secretaría de Educación Pública for our research. The cover photograph was taken by Rigoberto Moreno on the coast of Nayarit, Mexico. The editors appreciate Rigo's kind contribution of his artwork for our book.
