

FOREWORD

The papers collected for publication in this volume are all based upon presentations made at the 11th International Congress of Parasitology (ICOPA) that was hosted by the British Society for Parasitology in Glasgow, in 2006.

Over 2000 delegates from 88 different countries took part in ICOPA XI and their presentation reflected the wide range of topics studies by Parasitologists world wide and the varied approaches that are made to these studies. We hope that you will enjoy this conference proceedings and that it represents the flavour of a truly international meeting.
