

Genetics You Can Use

This new Seventh Edition of *Human Heredity* focuses on providing you with information that will help you assess the genetic and biotechnological issues you will encounter throughout your life. With expanded coverage of hot topics like recombinant DNA technology, genetic engineering, cloning, stem cell research, biotechnology, and genomics, Cummings clearly and concisely draws you into the most current research in genetics, giving you unprecedented access to the topics of interest to you. In addition, this edition is accompanied by an incredible array of technology options designed to bring genetics to life, inside the classroom and out!

Bring Genetics to Life!

Further enhance your learning with:

FREE ACCESS!

**HUMAN
Genetics Now™**

Human Genetics Now™
(0-495-01139-8)

Human GeneticsNow is a powerful, personalized online learning companion designed to help you gauge your own learning needs and identify the concepts on which you most need to focus your study time. The site has quizzes, Active Figures, interactive animations—and access to it is FREE with your purchase of a new text. Study smarter—and make every minute count!

FREE ACCESS!

**InfoTrac® College Edition
with InfoMarks™**

With your new copy of this text, you receive four months of FREE access to InfoTrac® College Edition AND to InfoWrite—a complete set of online writing and research tools. InfoTrac College Edition offers a fully searchable database of more than 20 years' worth of complete articles from almost 5,000 academic and popular periodicals. And InfoWrite makes writing in-depth research papers easy with guides to writing research papers, grammar, "critical thinking" guidelines, and much more!

For more help and study — consider these additional resources to help you excel in your genetics course:

Gene Discovery Lab (0-534-37717-3)

This molecular techniques hybrid CD-ROM/website provides a virtual laboratory environment that allows you to explore concepts by simulating molecular techniques. Exciting, interactive, and visual, Gene Discovery Lab augments your genetics course.

**A Problem-Based Guide to Basic Genetics,
4th Edition** (0-534-49549-4)

This brief text provides you with a systematic approach to solving genetics problems, interspersed with numerous solved problems and practice problems—now with new examples based on recent literature!

Study Guide (0-534-49476-5)

Featuring chapter-by-chapter summaries, learning objectives, lists of terms, case worksheets, discussion problems & questions, and practice test items, this guide is sure to enhance your understanding of the text!
