

For almost 60 years, continued research on the subject of Bovine Viral Diarrhea (BVD) has raised as many questions as have been answered. This common disease continues to cause sickness, death, abortion, and fetal anomalies despite the millions of vaccinations administered each year to prevent its spread.

Written by international experts, *Bovine Viral Diarrhea Virus: Diagnosis, Management, and Control* includes the latest information on BVD and aims to answer the many questions surrounding this common problem. This complete text not only outlines methods of diagnosis, but focuses also on BVD management and control. Researchers, academics, and large animal practitioners will find this book an irreplaceable resource for understanding and controlling outbreaks of BVD.

About the Editors:

Sagar M. Goyal, BVSc, PhD, professor, Department of Veterinary Population Medicine, College of Veterinary Medicine, University of Minnesota, St. Paul.

Julia F. Ridpath, PhD, Virus and Prion Diseases of Livestock Research Unit, NADC/ARS/USDA, Ames, Iowa.
