

The cover image is a structural model of a K^+ channel, a type of pore-forming transmembrane protein that allows the rapid movement of specific ions across cell membranes. This image first appeared on the cover of the August, 2000, issue of *Trends in Biochemical Sciences* (vol. 25, no. 8) and was designed by Geraldine Woods.

McGraw-Hill offers various tools and technology to support the third edition of *Biochemistry: The Molecular Basis of Life*. You can order supplemental study materials by contacting your bookstore or the McGraw-Hill Customer Service Department at 1-800-338-3987.

STUDENT STUDY GUIDE/SOLUTIONS MANUAL 0-07-242449-4

For each text chapter, a corresponding study guide chapter offers comprehensive reviews, study tips, and additional questions.
