

INTERFERON

Each year Ion Gresser and the Editorial Board of the Interferon series highlight areas of current interest in interferon and so provide a forum for the diverse aspects of this research. Now in its sixth year the series follows an established format that with rapid publication allows research workers to keep abreast with current developments in this exciting and fast-moving field.

From the reviews of previous volumes

"... its aims are unique in providing the reader with a vision of the future as well as a hard glance at the past ... quite readable by students, yet full of novel ideas for the active interferon researcher."

E.M. Martin in *Australian Society of Microbiology News*

"Interferon 3, 1981, the third volume in a series covering interferon biology, is an excellent review ... A continuation of this series is highly recommended."

Robert K. Oldham in *ASM News*

INTERFERON 5 1983

Editor-in-chief: Ion Gresser

1983, xi + 239pp.
0.12.302254.1

Contents

Michel Aguet and Knud Erik Mogensen: Interferon receptors. Corrado Baglioni and Timothy W. Nilsen: Mechanisms of antiviral action of interferon. Ernest C. Borden: Interferons and cancer: How the promise is being kept. G.M. Scott: The toxic effects of interferon in man. Philip I. Marcus: Interferon induction by viruses: One molecule of dsRNA as the threshold for interferon induction. Rik Derynck: More about interferon cloning. Michel Revel: Genetic and functional diversity of interferons in man.

INTERFERON 4 1982

Editor-in-chief: Ion Gresser

1982, xii + 200pp.
0.12.302253.3

INTERFERON 3 1981

Editor-in-chief: Ion Gresser

1981, x + 154pp.
0.12.302252.5

INTERFERON 2 1980

Editor-in-chief: Ion Gresser

1980, xii + 100pp.
0.12.302251.7

INTERFERON 1 1979

Editor-in-chief: Ion Gresser

1979, xii + 164pp.
0.12.302250.9
