

What genetic modifications transform marine sticklebacks into freshwater forms?
See Chapter 16: Mechanisms of Speciation.

What do female spotted cucumber beetles look for in a mate?
See Chapter 11: Sexual Selection.

Why do Virginia opossums age faster and die younger in some populations than in others?
See Chapter 13: Aging and Other Life History Characters.

What does the modification of plants and animals by selective breeding suggest about the mechanism of evolution in nature?
See Chapter 3: Darwinian Natural Selection.
