

"This is an excellent lab manual...a significant improvement over those currently available."

DR. WILLIAM H. COLEMAN, UNIVERSITY OF HARTFORD

"It is an outstanding laboratory manual."

DR. VAN H. GROSSE, COLUMBUS STATE UNIVERSITY

"I can tell that the author[s] is an experienced microbiologist...with knowledge and experience far beyond mine in most areas covered. He/she is also obviously an excellent teacher, with explanations far beyond the norm and very helpful tidbits throughout the text. I think this lab manual should fare very well, particularly with the current competition."

PROFESSOR JAMES HERRICK, JAMES MADISON UNIVERSITY
