

**Make studying a dynamic, interactive experience—
explore the world of psychology with Psyk.trek™!**

Psyk.trek makes learning psychology fascinating. You'll find that studying is fun when you are asked to create illusions, work through interactive simulations, view films, and quiz yourself on **Psyk.trek**.

This multimedia CD-ROM is keyed to important concepts covered in each chapter of *Psychology: Themes & Variations, Fourth Edition*—providing an easy way to review. Icons in the text point you to modules on the CD-ROM.

Whether you are learning about anxiety disorders, sleep patterns, or sensation and perception, psychology topics virtually come to life on the screen with stunning visuals, high-level interactivity, real-time video, animated graphics, voice-overs, and music.

Everything about **Psyk.trek** is hands-on and engaging, from the Interactive Learning Modules and Interactive Study Guide to the Simulations and Multimedia Glossary. **Psyk.trek** even provides you with audio feedback and printable scores when you work through the Self-Tests and Quizzes.

Psyk.trek CD Digibox: 0-534-34286-8

Smart-Pak Bundle for Students (Text + Psyk.trek): 0-534-81125-6

Also available to accompany this text is a *Study Guide* by Ronald Wasden and Richard Stalling. The *Study Guide* offers a mixture of exercises, questions, and self-tests to help you review and prepare for tests and quizzes. ISBN: 0-534-35066-6
