

ADVANCE PRAISE FOR
THE RED APE

REVISED AND UPDATED EDITION

"Jeffrey Schwartz is the most original thinker in paleoanthropology today. In this thoroughly revised edition of a classic book he presents a compelling argument that many of our species' peculiarities are in fact the legacy of our close relationship with the remarkable Asian orangutan. Along the way he explores the many ways in which we attempt to understand our own place in nature, and presents a novel perspective upon the evolutionary process itself. A must-read for anyone interested in how our astonishing species got to where it is today."

—IAN TATTERSALL, AUTHOR OF
BECOMING HUMAN AND THE MONKEY IN THE MIRROR

"In this updated edition of *The Red Ape* Jeffrey Schwartz chisels away at chronic flaws in the theory that the pygmy chimpanzee is our closest relative. Our understanding of human nature is indebted to Schwartz's perseverance in the face of overwhelming opposition. *The Red Ape* is a classic."

—DONALD PERRY, AUTHOR OF *LIFE ABOVE THE JUNGLE FLOOR*

"*The Red Ape* raises profound questions about scientific reasoning, about the interpretation of biological data, and about what we believe to 'know.' This book represents a passionate account of an ongoing struggle of scientific ideas. And it reminds us of the duty to look after the big red apes who might become extinct before we realize that they were our closest evolutionary cousins."

—GERD B. MÜLLER, DEPARTMENT OF THEORETICAL BIOLOGY,
UNIVERSITY OF VIENNA
