PRINCIPLES AND APPLICATIONS IN ENGINEERING SERIES

Biotechnology for Biomedical Engineers

YARMUSH • TONER • PLONSEY • BRONZINO

REFERENCES SHARPLY FOCUSED ON PARTICULAR ENGINEERING TOPICS AND SUBSPECIALTIES,
COMPRISING CHAPTERS CAREFULLY SELECTED FROM CRC'S BESTSELLING HANDBOOKS
AND LOGICALLY ORGANIZED FOR OPTIMUM UTILITY.

From editors of the award-winning *Biomedical Engineering Handbook*, *Biotechnology for Biomedical Engineers* covers the aspects of biotechnology specifically relevant to biomedical engineers. Topics include protein engineering, monoclonal antibody production, applications of nucleic acid chemistry, antisense technology, applied virology, cell structure and function, and more.

ALSO AVAILABLE:

Biomedical Imaging provides an overview of the main medical imaging devices and highlights emerging systems. With applications ranging from imaging the whole body to replicating cellular components, the imaging modalities discussed include x-ray systems, computed tomographic systems, magnetic resonance imaging, nuclear medicine, ultrasound, MR microscopy, virtual reality, and more. **ISBN: 0-8493-1810-6**

Tissue Engineering provides an overview of the major physiologic systems of current interest to biomedical engineers: cardiovascular, endocrine, nervous, visual, auditory, gastrointestinal, and respiratory. It contains useful definitions, tables of basic physiologic data, and an introduction to the literature. Then the book reviews the status of tissue engineering of specific organs, including bone marrow, skeletal muscle, and cartilage. **ISBN: 0-8493-1812-2**

Clinical Engineering focuses on managing the deployment of medical technology and integrating it appropriately with desired clinical practices. It provides a description of the wide range of responsibilities clinical engineers encounter, describes technology management and assessment, and reviews the standards and regulatory agencies of interest. It also details various biomedical sensors, considering both biologic and electronic factors in sensor performance, and covers bioinstrumentation.
