

Working with Molecular Cell Biology

A Study Companion and Solutions Manual

FIFTH
EDITION

BRIAN STORRIE • ERIC A. WONG • RICHARD A. WALKER
GLENDA GILLASPY • JILL SIBLE • MURIEL LEDERMAN

Virginia Polytechnic Institute and State University

This study guide will take you chapter-by-chapter through *Molecular Cell Biology, Fifth Edition*, with quick questions you can use to quiz yourself and in-depth questions that will guide you to the finer points of the textbook. Each chapter contains the following:

- **Chapter Summary** provides a brief outline of the chapter's key points.
- **Multiple Choice** helps you test yourself on the concepts.
- **Reviewing Concepts** gives you a slate of essay questions similar to those found at the end of each chapter in the textbook. These questions help you relate important themes and come to a more complete understanding of the concepts.
- **Analyzing Experiments** shows how the ideas in the book can be applied to the laboratory. Each question describes an experiment and provides the data it generates. Interpreting the data will help you cement your knowledge of the topics.
- **Solutions** for all the multiple choice, reviewing concepts, and analyzing experiments questions, as well as answers to the problems in the textbook are included.
