

INTERNATIONAL REVIEW OF CYTOLOGY

A SURVEY OF CELL BIOLOGY Volume 244

Edited by

KWANG W. JEON

University of Tennessee, Knoxville, U.S.A.

International Review of Cytology presents current advances and comprehensive reviews in cell biology—both plant and animal. Articles address structure and control of gene expression, nucleocytoplasmic interactions, control of cell development and differentiation, and cell transformation and growth. Authored by some of the foremost scientists in the field, each volume provides up-to-date information and directions for future research.

Praise for the Series

"A valuable addition to any college library as current-reference material for advanced undergraduates, graduate students, and professional scientists."

CHOICE

Contents Include

- Plastid RNA polymerases, promoters, and transcription regulators in higher plants
- Making ends meet: maintenance of golgi apparatus structure and protein recycling to the endoplasmic reticulum
- Nucleocytoplasmic trafficking in plant cells
- Building in vitro models of organs
- Mitochondria-derived organelles in protists and fungi
- The flagellum of trypanosomes
- Regulation of growth and differentiation in dictyostelium
