

Sertoli Cell Biology

Edited by

Michael K. Skinner and Michael D. Griswold

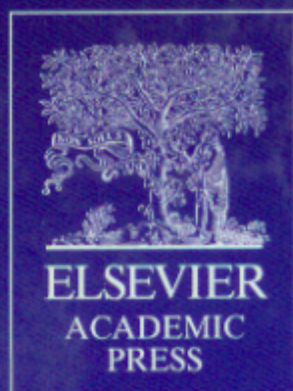

Center for Reproductive Biology, School of Molecular Biosciences
Washington State University, Pullman, Washington, U.S.A.

This book provides a state-of-the-art update on the topic of Sertoli cells and male reproduction. It addresses such highly topical areas as stem cells, genomics, and molecular genetics, as well as provides historical information on the discovery of this type of cell and the pathophysiology of male infertility.

Key Features

- Topical discussion of stem cells, genomics, and molecular genetics
- Presents pathophysiology of male infertility
- Includes historical information on discovery of the cell
- State-of-the-art chapters on current science advancements
- Represents the only current review reference on the topic
