

- The most accurate and comprehensive taxonomic checklist ever published in a single volume
- Now in its third, fully revised and updated edition
- Existing data rigorously reassessed by a team of regional experts
- All species and subspecies described since 'Peters's Check-list' (1931–87) fully referenced, for the first time in any checklist
- Around 4,000 footnotes explaining taxonomic choices, and 3,000 references including all authorities for recently described taxa
- Introductory sections discuss the rationale behind the list sequence, as well as key concepts and new developments in the study of avian taxonomy
- All taxa fully indexed by English and scientific names – the latter to subspecies level for the first time
