

Put on your boots and prepare to get your feet wet!
Let's explore America's wetlands!

Moose • White pelican • Alligator • Cattail • Iris

Where can you find these intriguing plants and animals?
These and many, many more live in bogs, marshes, and
swamps found all over North America.

- Identify wetland types by region
- Find out how wetlands clean water and protect the environment
- Learn to distinguish animal tracks and signs

Delightful full-color illustrations and lively descriptions help not only
in identifying wetland types but also introduce plants and animals and
provide enjoyment for the whole family. With maps, a list of common
and scientific names, and additional resources, *America's Wetlands* is a
complete guide to North America's most exciting ecosystem.

Marianne D. Wallace is a natural science educator and illustrator.
Her work has appeared in more than twenty books and
publications. She previously worked as a school science teacher.
Recently she received the Women of Achievement Award from
the YWCA of San Gabriel Valley. Marianne lives in Monrovia,
California, with her botanist husband and their two sons.
