

**"... a major achievement in photographic
and ornithological publishing."**

Ibis, British Ornithologists' Union magazine

Appealing to birdwatchers and seabird enthusiasts, this is a unique and comprehensive collection of photographs and descriptions of the world's seabirds.

- 800 spectacular full-colour photographs taken by some of the world's leading bird photographers. Includes many invaluable flight shots, showing a wide variety of plumages and behaviour.
- A detailed, informative text, meticulously researched by Jim Enticott, one of the world's leading seabird experts.
- Nearly 300 species described in detail. Plumage variations, habitat, behaviour, status and distribution are covered.
