

The Cell in Medical Science

edited by Felix Beck

Department of Anatomy
University of Leicester, England

and John B. Lloyd

Research Unit in Biochemistry
University of Keele, Staffordshire, England

"A generally high standard is maintained in these two volumes...."

"The contributors are well chosen, and each chapter provides an up-to-date review of its subject without unnecessary detail."

The Lancet

"The Cell in Medical Science is an essential addition to all medical and science libraries, where it will be valuable for teachers and research workers, as well as for senior undergraduates."

Nature

Volume 4

1976, xvi + 430pp., 0.12.084204.1

Contents

Cellular Control Mechanisms. Intracellular control mechanisms. Protein synthesis and its control. Some aspects of intercellular regulation. **Cellular Responses to Environment.** An introduction to immunology. Cancer and carcinogenesis. The macrophage. Acute inflammation. Wound healing. Author index. Subject index.

Volume 3

1976, xvi + 442pp., 0.12.084203.3

Contents

Cellular Specialization (continued). Connective tissue cells. Central nervous control of gonadotrophic function. Anterior pituitary control of hormonal mechanisms. The thyroid. The adrenal cortex. The adrenal medulla. Cells of the Islets of Langerhans. The absorptive cell. The secretory cell. The liver cell in bile formation. Author index. Subject index.

Volume 2

1974, xviii + 598pp., 0.12.084202.5

Contents

Cellular Genetics and Development: Biochemical genetics. General mammalian cytogenetics. An introduction to human cytogenetics. Sex chromatin. The kinetics of cell production. Cell differentiation. Cell growth and morphogenesis. Ageing. **Cellular Specialization.** The neurone. The synapse. Satellite cells of neurons. The skeletal muscle cell. The muscle spindle. The smooth muscle cell. Author index. Subject index.

Volume 1

1974, xiv + 366pp., 0.12.084201.7

Contents

The Cell and its Organelles. The cell as a unit. Membranes and trans-membrane transport. The cell surface. The nucleus. Cytochromes and ribosomes. Mitochondria and peroxisomes. Lysosomes. Subcellular pathology. Author index. Subject index.
