Review

The book provides very well selected examples that permit an easy comprehension of the achievements expected from the different techniques. I consider the book suitable for both experimentalists and theoreticians ... it also provides an excellent selection of key references on the main techniques available in the field which are very useful for students and research workers.

国外生命科学优秀教材影印系列 已经推出:

生物学原理(<i>Concepts in Biology</i> , 10th ed)	Enger <i>et al.</i>	¥ 55.00
分子生物学精要(<i>Essentials of Molecular Biology</i> , 3rd ed)	Malacinski <i>et al.</i>	¥ 56.00
生物化学原理(<i>Principles of Biochemistry</i> , 3rd ed)	Horton <i>et al.</i>	¥ 78.00
遗传学——基因与基因组分析(<i>Genetics: Analysis of Genes and Genomes</i> , 5th ed)	Hartl <i>et al.</i>	¥ 88.00
微生物学导论(<i>Introduction to Microbiology</i> , 2nd ed)	Ingraham <i>et al.</i>	¥ 76.00
生态学(<i>Ecology</i> , 5th ed)	Krebs	¥ 65.00
生物技术导论(<i>Basic Biotechnology</i> , 2nd ed)	Ratledge <i>et al.</i>	¥ 55.00
神经科学精要(<i>Essentials of Neural Science and Behavior</i>)	Kandel <i>et al.</i>	¥ 68.00
进化生物学(<i>Evolution</i> , 3rd ed)	Strickberger	¥ 78.00
医学分子生物学(<i>Molecular Biology in Medicine</i>)	Cox <i>et al.</i>	¥ 55.00
代谢与细胞工程导论(<i>An Introduction to Metabolic and Cellular Engineering</i>)	Cortassa <i>et al.</i>	¥ 32.00
