

With the continuing expansion of the practice of Microbiology, the biggest challenge in the preparation of Manual of Practical Microbiology and Parasitology has been to provide a concise volume with all up-to-date technology for Medical students.

The book contains more than 200 colour plates and 50 illustrations that set out the basic facts and principles clearly and briefly which are essentially visual in impact. The book will also prove useful to other groups such as veterinary science students, medical laboratory technology students specialising in Microbiology and postgraduate students of Microbiology.

Appendices which contain current question papers of MBBS and MD examinations in Microbiology have been incorporated which will help the students to prepare for their examination.

At the end of each chapter, a question-answer format has been included in order to acquaint the students with the type of oral questions which she/he has to face in the examination.
