

Plant Tissue Culture is an integral part of plant biotechnology, and has resulted in many frontier research findings. This book on Plant tissue culture deals with the principles and most of the techniques being employed in the tissue culture. Majority of the aspects have been covered in eleven chapters with focus on methodology, advantages and applications of the techniques. The application of plant tissue culture in sustaining the deteriorating biodiversity has also been highlighted.

Dr. Padmanabh Dwivedi, M.Sc. (BHU Gold Medal), Ph.D. (Cambridge), is a Lecturer in Botany, Arunachal University, Itanagar. He has outstanding academic career throughout. He has received several national and international scholarships and awards including Young Scientist Award of Council of Science and Technology, Govt. of U.P., Cambridge, Nehru Scholarship, UNESCO/Czech Academy of Sciences Fellowship, Overseas Research Studentship Award of the U.K., INSA Visiting Fellowship, Downing Muller Scholarship of Cambridge. Dr. Dwivedi has presented research papers in eight international conferences, six being abroad. He has several publications in refereed journals of national and international repute. Dr. Dwivedi is the Principal Investigator of the DBT-sponsored major research project. He has wide Educational Administrative experience including Editor-in-Chief of the Arunachal University Research Journal. Dr. Dwivedi has visited several countries.
