

Biodiversity & Biotechnology

Editors

Samit Ray
Arun K. Ray

Salient Features

This book is the first of its kind in Indian market with a thoroughly edited text containing twenty-two cutting-edge articles on fundamental and modern aspects of Biodiversity and Biotechnology.

Topics covered in this book are included in the syllabi of postgraduate courses of Botany, Zoology, Microbiology, Biotechnology, and other allied subjects of major Indian universities.

Latest topics like *Monitoring of Biodiversity by the Study of DNA, Antisense RNA Technology, Single Nucleotide Polymorphism, Protoplast Culture, Probiotics, and Application of Biotechnology in all the Major Groups of Living Organisms* have been included in the text.

The articles, well-referenced and written in lucid language, cover all the relevant topics in a manner, which is ideally suitable for the students of Life Sciences.

The articles are written by experienced university professors, scientists, and experts in the concerned fields who have earned wide eminence over the years for their erudite scholarship.

The volume contains an indispensable text for GATE, NET, and SLET candidates
