

INTERNATIONAL
REVIEW OF CELL AND
MOLECULAR BIOLOGY

Volume 276

Edited by
KWANG W. JEON

University of Tennessee, Knoxville, U.S.A.

International Review of Cell and Molecular Biology presents current advances and comprehensive reviews in cell biology—both plant and animal. Articles address structure and control of gene expression, nucleocytoplasmic interactions, control of cell development and differentiation, and cell transformation and growth. Authored by some of the foremost scientists in the field, each volume provides up-to-date information and directions for future research.

Praise for the Series

"Should be on the shelf of any biomedical library"

DOODY'S

"Maintains the tradition and set-up of the previous volumes and certainly provides up-to-date data on varied aspects of cytology...a valuable acquisition to any library."

THE NUCLEUS

Contents Include

- Cytokinin Signaling During Root Development
- Live-Cell Imaging in the Study of Neurodegeneration
- Interactions Between Heparan Sulfate and Proteins—Design and Functional Implications
- Fibroblasts—A Diverse Population at the Center of It All
- Imprinting and Extraembryonic Tissues—Mom Takes Control
- Cell and Molecular Biology of ATP-Binding Cassette Proteins in Plants
- Cell and Molecular Biology of the Fastest Myosins
