

IMPROVE YOUR UNDERSTANDING OF BIOLOGY

WITH THIS FULL-COLOR AND EASY-TO-USE MANUAL!

One of the best ways to succeed in your biology course is through hands-on lab experience.

With its 46 lab exercises and hundreds of color photos and illustrations, the

Laboratory Manual for General Biology, 5th Edition, is your guide to a better understanding of biology.

Most exercises can be completed within two hours, and the knowledge you'll gain will help you not only in your course, but also in making informed decisions about biological questions in your everyday life

The perfect companion to

Starr and Taggart's Biology: The Unity and Diversity of Life, 11th Edition, as well as

Starr's Biology: Concepts and Applications, 6th Edition, and

Starr's Biology Today and Tomorrow, 2nd Edition this lab manual can also be used with any introductory biology text.

Flexible for instructors and accessible for students, this manual includes:

- Simple introductions to exercises, as well as numbered, step-by-step instructions to make each exercise easier to understand.
- More than 600 colorful and clearly labeled photos, diagrams, and illustrations.
- A modular structure. Each section of an exercise is self contained with its own procedure and materials list. Plus, instructors can match assignments to their own lab preferences.
- An emphasis on hypothesis testing with investigative (experimental) options, which helps you learn and use the scientific process.
- Pre-lab questions that prepare you for the exercise, and post-lab questions that focus on what was learned directly from the exercise.

Instructors
This is a great lab manual to customize!
