

A Clear, Current Introduction to the World of the Cell

The World of the Cell, Seventh Edition, combines the most readable text with coverage of recent research advances. The text emphasizes basic concepts in cell biology and effectively prepares students for future applied or advanced biology courses. The trademark features of previous editions—art that teaches, Multi-level Problem Sets, and Concept Statements—have been augmented with new, time-saving study tools and “Mini-captions” for selected figures.

Resources to Help You Succeed in Biology

Packaged at no additional charge with every new copy of the text:

The Cell Place Website

www.thecellplace.com

Packaged with every new copy of the text, The Cell Place website engages students with more than 80 animations and interactive activities that reinforce your understanding of key concepts explained in the text. The Cell Place also contains a pop-up, searchable glossary and customizable flashcards, practice quizzes, a link to Research Navigator, a grade book, and a wealth of microscopy sequences that show cellular processes in action.

Available separately or within a value package with the text:

Student Solutions Manual

978-0-321-52747-9 / 0-321-52747-X

Written by the authors, this is a collection of complete, detailed answers for all of the end-of-chapter questions and problems.

BiologyLabs On-Line: Cell Version

978-0-8053-4865-1 / 0-8053-4865-4

Students can expand their horizons beyond the traditional wet lab experience by performing potentially dangerous, or expensive experiments in a safe online environment. Labs included are HemoglobinLab, MitochondriaLab, EnzymeLab, and TranslationLab. Go to www.biologylabsonline.com for more information.

Also Available:

Principles of Cancer Biology

By Lewis J. Kleinsmith

978-0-8053-4003-7 / 0-8053-4003-3

This compelling book provides students with a “big picture” view of cancer that emphasizes the scientific evidence that underlies what we know about cancer biology, and teaches students to think critically about the evidence and new additions to it.
