

# Annual Plant Reviews, Volume 38 Fruit Development and Seed Dispersal

Annual  
Plant  
Reviews

Edited by Lars Østergaard

Fruit development and seed dispersal are major topics within plant and crop sciences teaching and research, with major new developments in our understanding being reported regularly.

*Fruit Development and Seed Dispersal* takes an approach beginning with carpel evolution, development of the *Arabidopsis* gynoecium, and ovule development, further topics reviewed include fertilisation and fruit initiation, *Arabidopsis* fruit development, and long distance seed dispersal. This latest volume in Wiley-Blackwell's internationally-renowned *Annual Plant Reviews* then concludes with cutting edge reviews of seed dispersal and domestication, tomato fruit ripening and parthenocarpy in crops.

Drawing together some of the world's leading experts in these areas, the Editor of this volume, Lars Østergaard, has provided a landmark publication that is essential reading for plant and crop scientists, developmental biologists, ecologists and evolutionary biologists. All libraries in universities where plant sciences, agriculture, biological and molecular sciences are studied and taught should have copies of this important volume on their shelves.

#### About the Editor

Lars Østergaard is a plant scientist based at the world famous John Innes Centre, Norwich, UK.
