

This long-awaited, first comprehensive book on this topic of fundamental importance in our understanding of health and disease begins with an overview of cell-matrix junctions before covering cell-cell junctions and the cross-talk between cell-matrix and cell-cell adhesion.

This book is of high interest to cell and molecular biologists, cancer researchers, oncologists, biochemists, and those working in the pharmaceutical industry.

Susan E. LaFlamme is a Professor in the Center for Cell Biology and Cancer Research at the Albany Medical College in Albany, USA. She obtained her B.A. from Barnard College and her PhD from Columbia University in New York, USA. Susan E. LaFlamme has received grants for her studies on integrin signaling and has published extensively in this area. She has served on review panels for the National Institutes of Health, the American Cancer Society and the American Heart Association.

Andrew P. Kowalczyk is an Associate Professor for Cell Biology and Dermatology at Emory School of Medicine in Atlanta, USA. Andrew P. Kowalczyk obtained his PhD at Albany Medical School in Albany, USA, and carried out postdoctoral studies at Northwestern University Medical School in Chicago, USA. He has received numerous grants and awards and has published extensively in the area of cell adhesion. He has served on review panels for the National Institutes of Health and the American Heart Association and on several advisory committees for the Society for Investigative Dermatology.
