

Go to the top of the class with these valuable study tools!

STUDENT STUDY GUIDE

by Nancy Boury

ISBN 0-07-255303-0

Specifically designed to support the concepts presented in *Foundations in Microbiology*, fifth edition, this completely new manual provides self-quizzing, vocabulary review, and learning activities, such as creating concept maps and completing tables of information.

MICROBES IN MOTION 3 CD-ROM

by Gloria Delisle and Lewis Tomalty

ISBN 0-07-233438-X

This interactive, easy-to-use general microbiology CD-ROM allows you to actively explore and understand microbial structure and function through audio, video, animations, illustrations, and text. Eighteen modules cover topics from microbial genetics to vaccines.

HYPERCLINIC 2 CD-ROM

by Lewis Tomalty and Gloria Delisle

ISBN 0-07-232312-4

Evaluate realistic case studies that include a patient history and description of signs and symptoms. Analyze the results of physician-ordered clinical tests to reach a diagnosis, or evaluate a case study scenario and then decide which clinical samples should be taken and which diagnostic tests should be run. More than 200 pathogens are profiled, 105 case studies presented, and 46 diagnostic tests covered.

FOUNDATIONS IN MICROBIOLOGY ONLINE LEARNING CENTER

www.mhhe.com/talaro5

Explore this dynamic site designed to help you get ahead and stay ahead in your study of microbiology. Some of the activities you will find on the website include:

- Self-quizzes to help you master material in each chapter
- Animations to assist you in visualizing difficult microbiology concepts
- Flash cards to ease your learning of new vocabulary
- Clinical case studies to allow you to apply your knowledge in realistic situations
