

INTERNATIONAL REVIEW OF CYTOLOGY

A SURVEY OF CELL BIOLOGY

Volume 259

Edited by

KWANG W. JEON

University of Tennessee, Knoxville, U.S.A.

International Review of Cytology presents current advances and comprehensive reviews in cell biology—both plant and animal. Articles address structure and control of gene expression, nucleocytoplasmic interactions, control of cell development and differentiation, and cell transformation and growth. Authored by some of the foremost scientists in the field, each volume provides up-to-date information and directions for future research.

Praise for the Series

"A valuable addition to any college library as current reference material for advanced undergraduates, graduate students, and professional scientists."

CHOICE

"Maintains the tradition and set-up of the previous volumes and certainly provides up-to-date data on varied aspects of cytology...a valuable acquisition to any library."

THE NUCLEUS

Contents Include

- Molecular Mechanism of Liver Development
- Molecular Basis of Vertebrate Endoderm Development
- YidC as an Essential and Multifunctional Component in Membrane Protein Assembly
- Mitotic Spindle Dynamics in *Drosophila*
- Neurogenesis in the Fish Retina
