

Advances in Virus Research—Volume 72

Edited by

Karl Maramorosch, Aaron J. Shatkin
and Frederick A. Murphy

Cover illustration: Lung of a pig infected with swine influenza virus. Necrotizing bronchiolitis in a pig 3 days postinoculation with swine influenza virus. Necrosis and reactive proliferation of epithelial cells is occurring with sloughing of these cells into the airway lumen which contains cellular debris, proteinaceous fluid and a few leukocytes. For more information, see Vincent et al. chapter in this volume.

Contents

The History and Evolution of Human Dengue Emergence

Nikos Vasilakis and Scott C. Weaver

Third-Generation Flavivirus Vaccines Based on Single-Cycle, Encapsidation Defective Viruses

Douglas G. Widman, Ilya Frolov, and Peter W. Mason

Swine Influenza Viruses: A North American Perspective

Amy L. Vincent, Wenjun Ma, Kelly M. Lager, Bruce H. Janke, Jürgen A. Richt

Replication and Partitioning of Papillomavirus Genomes

Alison A. McBride

Rhesus Cytomegalovirus: A Nonhuman Primate Model for the Study of Human Cytomegalovirus

Yujuan Yue and Peter A. Barry

Drosophila Viruses and the Study of Antiviral Host-Defense

Tünde Huszar and Jean-Luc Imler
