

INTERNATIONAL
REVIEW OF CELL AND
MOLECULAR BIOLOGY

Volume 269

Edited by

KWANG W. JEON

University of Tennessee, Knoxville, U.S.A.

International Review of Cell and Molecular Biology presents current advances and comprehensive reviews in cell biology—both plant and animal. Articles address structure and control of gene expression, nucleocytoplasmic interactions, control of cell development and differentiation, and cell transformation and growth. Authored by some of the foremost scientists in the field, each volume provides up-to-date information and directions for future research.

Praise for the Series

"Should be on the shelf of any biomedical library"

DOODY'S

"Maintains the tradition and set-up of the previous volumes and certainly provides up-to-date data on varied aspects of cytology...a valuable acquisition to any library."

THE NUCLEUS

Contents Include

- Trophic Factors in the Carotid Body
- Structure of the Insect Oocyte Nucleus with Special Reference to Interchromatin Granule Clusters and Cajal Bodies
- Galactose Metabolism in Yeast – Structure and Regulation of the Leloir Pathway Enzymes and the Genes Encoding Them
- Signaling Systems of Lower Eukaryotes and Their Evolution
- Mechanisms of Sister Chromatid Pairing
- Teleost Lens Development and Degeneration
