

INTERNATIONAL
REVIEW OF CELL AND
MOLECULAR BIOLOGY

Volume 272

Edited by
KWANG W. JEON

University of Tennessee, Knoxville, U.S.A.

International Review of Cell and Molecular Biology presents current advances and comprehensive reviews in cell biology—both plant and animal. Articles address structure and control of gene expression, nucleocytoplasmic interactions, control of cell development and differentiation, and cell transformation and growth. Authored by some of the foremost scientists in the field, each volume provides up-to-date information and directions for future research.

Praise for the Series

"Should be on the shelf of any biomedical library"

DOODY'S

"Maintains the tradition and set-up of the previous volumes and certainly provides up-to-date data on varied aspects of cytology...a valuable acquisition to any library."

THE NUCLEUS

Contents Include

- Roles of F-BAR/PCH Proteins in the Regulation of Membrane Dynamics and Actin Reorganization
- New Insights into the Roles of Dendritic Cells in Intestinal Immunity and Tolerance
- Transcriptional Control of Gene Expression by Actin and Myosin
- Roles of Eukaryotic Lsm Proteins in the Regulation of mRNA Function
- Spatiotemporal Dynamics of the ER-Derived Peroxisomal Endomembrane System
- New Insights into Melanosome Transport in Vertebrate Pigment Cells
- Compartmentalizing the Neuronal Plasma Membrane: From Axon Initial Segments to Synapses
