

INTERNATIONAL
REVIEW OF CELL AND
MOLECULAR BIOLOGY

Volume 275

Edited by
KWANG W. JEON

University of Tennessee, Knoxville, U.S.A.

International Review of Cell and Molecular Biology presents current advances and comprehensive reviews in cell biology—both plant and animal. Articles address structure and control of gene expression, nucleocytoplasmic interactions, control of cell development and differentiation, and cell transformation and growth. Authored by some of the foremost scientists in the field, each volume provides up-to-date information and directions for future research.

Praise for the Series

"Should be on the shelf of any biomedical library"

DOODY'S

"Maintains the tradition and set-up of the previous volumes and certainly provides up-to-date data on varied aspects of cytology...a valuable acquisition to any library."

THE NUCLEUS

Contents Include

- Cell and Molecular Biology of Invertebrates
- Viral Channel-Forming Proteins
- Notch Signaling in Chondrogenesis
- The Controversial Role of Mast Cells in Tumor Growth
- Limbal Stem Cells: Application in Ocular Biomedicine
- Cell and Molecular Biology of the Novel Protein Tyrosine-Phosphatase-Interacting Protein 51
