

Volume 66

Advances in GENETICS

Serial Editors

Theodore Friedmann University of California at San Diego, School of Medicine, USA

Jay C. Dunlap Dartmouth Medical School, Hanover, NH, USA

Stephen F. Goodwin University of Oxford, Oxford, UK

The field of genetics is rapidly evolving, and new medical breakthroughs are occurring as a result of advances in knowledge gained from genetics research. **Advances in Genetics** continually publishes important, timely reviews from leaders in the field that cover a broad range of topics of interest to geneticists and their colleagues in affiliated disciplines. This volume includes articles on:

- The Molecular Links Between TDP-43 Dysfunction and Neurodegeneration
- Resources and Strategies to Integrate the Study of Ethical, Legal, and Social Implications of Genetics into the Undergraduate Curriculum
- Synthetic Genetic Interactions: Allele Dependence, Uses, and Conservation

Praise for **Advances in Genetics**:

"Outstanding both in variety and in the quality of its contributions."

NATURE

"Can be highly recommended to geneticists, and biologists in general...will prove to be of high importance for the development of the science of genetics."
