

Volume 69

# Tissue-Specific Vascular Endothelial Signals and Vector Targeting, Part B

Serial Editors

Theodore Friedmann University of California at San Diego, School of Medicine, USA

Jay C. Dunlap Dartmouth Medical School, Hanover, NH, USA

Stephen F. Goodwin University of Oxford, Oxford, UK

The field of genetics is rapidly evolving, and new medical breakthroughs are occurring as a result of advances in knowledge gained from genetics research. **Advances in Genetics** continually publishes important, timely reviews from leaders in the field that cover a broad range of topics of interest to geneticists and their colleagues in affiliated disciplines. This volume includes articles on:

- MR Molecular Imaging of Tumor Vasculature and Vascular Targets
- An Integrated Approach for the Rational Design of NanoVectors for Biomedical Imaging and Therapy
- Targeted Systemic Gene therapy and Molecular Imaging of Cancer: Contribution of the Vascular Targeted AAVP Vector
- Cationic and Tissue-Specific Protein Transduction Domains: Identification, Characterization and Therapeutic Application
- GPR78 Signaling Hub: A Receptor for Targeted Tumor Therapy
- On the Synergistic Effects of Ligand-Mediated and Phage-Intrinsic Properties During *In Vivo* Selection

## Praise for *Advances in Genetics*:

*"Outstanding both in variety and in the quality of its contributions."*

NATURE

*"Can be highly recommended to geneticists, and biologists in general...will prove to be of high importance for the development of the science of genetics."*
