

A derivative of the *Encyclopedia of Inland Waters*, **Plankton of Inland Waters** covers protists, bacteria, fungi, algae, and zooplankton as well as the functional and system interactions of planktonic and attached forms in aquatic ecosystems. **Plankton of Inland Waters** will be of interest to professionals and teachers in the fields of limnology, aquatic ecology, environmental engineering, hydrology and environmental science. Because the articles are drawn from an encyclopedia, the articles are easily accessible to interested members of the public, such as conservationists and environmental decision makers.

- Includes an up-to-date summary of global aquatic ecosystems and issues.
- Covers current environmental problems and management solutions.
- Features full-color figures and tables to support the text and aid in understanding.

Cover: Painting by Robert G. Wetzel.
