

INTERNATIONAL
REVIEW OF CELL AND
MOLECULAR BIOLOGY

Volume 290

Edited by
KWANG W. JEON

University of Tennessee, Knoxville, TN, U.S.A.

International Review of Cell and Molecular Biology presents current advances and comprehensive reviews in cell and molecular biology—both plant and animal. Articles address structure and control of gene expression, nucleocytoplasmic interactions, control of cell development and differentiation, and cell transformation and growth. Authored by some of the foremost scientists in the field, each volume provides up-to-date information and directions for future research.

Praise for the Series

"Should be on the shelf of any biomedical library."

DOODY'S

"Maintains the tradition and set-up of the previous volumes and certainly provides up-to-date data on varied aspects of cell and molecular biology...a valuable acquisition to any library."

THE NUCLEUS

Contents include

- Mast Cells in Nonmammalian Vertebrates: An Overview
- Control of Actin Assembly by the WH2 Domains and Their Multifunctional Tandem Repeats in Spire and Cordon-Bleu
- Role for Primary Cilia as Flow Detectors in the Cardiovascular System
- Chemical Stress on Protein Disulfide Isomerases and Inhibition of their Functions
- Retrograde Signaling Pathway from Plastid to Nucleus
- New Insights into the Regulation of Vascular Permeability
