

INTERNATIONAL
REVIEW OF CELL AND
MOLECULAR BIOLOGY

Volume 289

Edited by
KWANG W. JEON

University of Tennessee, Knoxville, TN, U.S.A.

International Review of Cell and Molecular Biology presents current advances and comprehensive reviews in cell and molecular biology—both plant and animal. Articles address structure and control of gene expression, nucleocytoplasmic interactions, control of cell development and differentiation, and cell transformation and growth. Authored by some of the foremost scientists in the field, each volume provides up-to-date information and directions for future research.

Praise for the Series

"Should be on the shelf of any biomedical library"

DOODY'S

"Maintains the tradition and set-up of the previous volumes and certainly provides up-to-date data on varied aspects of cell and molecular biology...a valuable acquisition to any library."

THE NUCLEUS

Contents include

- Programmed Necrosis: From Molecules to Health and Disease
- Physiological Cartilage Tissue Engineering: Effect of Oxygen and Biomechanics
- New Insights into the Regulation of Stomatal Opening by Blue Light and Plasma Membrane H^+ -ATPase
- Significance of Talin in Cancer Progression and Metastasis
- New Insights into the Mechanisms and Roles of Cell-Cell Fusion
- New Insights into the Mechanism of Fertilization in Nematodes
