

INTERNATIONAL
REVIEW OF CELL AND
MOLECULAR BIOLOGY

Volume 288

Edited by
KWANG W. JEON

University of Tennessee, Knoxville, TN, U.S.A.

International Review of Cell and Molecular Biology presents current advances and comprehensive reviews in cell and molecular biology—both plant and animal. Articles address structure and control of gene expression, nucleocytoplasmic interactions, control of cell development and differentiation, and cell transformation and growth. Authored by some of the foremost scientists in the field, each volume provides up-to-date information and directions for future research.

Praise for the Series

"Should be on the shelf of any biomedical library"

DOODY'S

"Maintains the tradition and set-up of the previous volumes and certainly provides up-to-date data on varied aspects of cell and molecular biology...a valuable acquisition to any library."

THE NUCLEUS

Contents include

- The Membrane Receptor for Plasma Retinol-Binding Protein, A New Type of Cell-Surface Receptor
- Vascular Smooth-Muscle-Cell Activation: Proteomics Point of View
- Molecular Basis for Endothelial Lumen Formation and Tubulogenesis During Vasculogenesis and Angiogenic Sprouting
- SUMO and Its Role in Human Diseases
- Focal Adhesion Kinase: Exploring FAK Structure to Gain Insight into Function
- Roles of Small Ubiquitin-Related Modifiers in Male Reproductive Function
