

Volume 74

Advances in GENETICS

Serial Editors

Stephen F. Goodwin University of Oxford, Oxford, UK

Theodore Friedmann University of California at San Diego, School of Medicine, USA

Jay C. Dunlap Dartmouth Medical School, Hanover, NH, USA

The field of genetics is rapidly evolving, and new medical breakthroughs are occurring as a result of advances in knowledge gained from genetics research. **Advances in Genetics** continually publishes important, timely reviews from leaders in the field that cover a broad range of topics of interest to geneticists and their colleagues in affiliated disciplines. This volume includes articles on:

- Introduction to this Volume
- The Itty-Bitty Time Machine: Genetics of the Cyanobacterial Circadian Clock
- The Genetics of Circadian Rhythms in *Neurospora*
- The Genetics Of Plant Clocks
- Molecular genetic analysis of circadian timekeeping in *Drosophila*
- Genetics of Circadian Rhythms in Mammalian Model Organisms
- The Genetics of the Human Circadian Clock

Praise for *Advances in Genetics*:

"Outstanding both in variety and in the quality of its contributions."

NATURE

"Can be highly recommended to geneticists, and biologists in general...will prove to be of high importance for the development of the science of genetics."
