

Contents

Mitochondrial and Eukaryotic Origins: A Critical Review

B. Franz Lang and Gertraud Burger

Gene Content and Gene Transfer from Mitochondria to the Nucleus During Evolution

Minoru Ueda and Koh-ichi Kadowaki

The Role of Horizontal Transfer in Shaping the Plant Mitochondrial Genome

Jeffrey P. Mower, Kanika Jain and Nancy J.G. Hepburn

Mitochondrial Genome Evolution and Gynodioecy

Pascal Touzet

Cyto-Nuclear Adaptation in Plants

F. Budar and S. Fujii

Mitochondrial Genomes of Photosynthetic Euglenids and Alveolates

Pavel Flegontov and Julius Lukeš

Evolution of Mitochondrial Introns in Plants and Photosynthetic Microbes

Linda Bonen

Green Algae Genomics: A Mitochondrial Perspective

Elizabeth Rodríguez-Salinas, Claire Remacle and Diego González-Halphen

Recombination in the Stability, Repair and Evolution of the Mitochondrial Genome

Kristina Kühn and José M. Guatberto

Mitochondrial Genome Evolution and the Emergence of Ppr Proteins

Bernard Gutmann, Anthony Gobert and Philippe Giegé

Evolution of Protein Import Pathways

Beata Kmiec, Elzbieta Glaser, Owen Duncan, James Whelan, Monika W. Murcha

Macromolecules Trafficking to Plant Mitochondria

Morgane Michaud and Anne-Marie Duchêne

Caption & credit: Left: Confocal microscope fluorescent mitochondria from a plant protoplast (IBMP, CNRS). Right (from top to bottom): Protein import pathways into mitochondria (Chapter 12); alternative tri-dimensional structure models for PPR domains (Chapter 10); three-domain tree of life based on rRNA sequence data (Chapter 1).
