

INTERNATIONAL REVIEW OF CELL AND MOLECULAR BIOLOGY

Volume 293

Edited by
KWANG W. JEON

University of Tennessee, Knoxville, TN, U.S.A.

International Review of Cell and Molecular Biology presents current advances and comprehensive reviews in cell and molecular biology — both plant and animal. Articles address structure and control of gene expression, nucleocytoplasmic interactions, control of cell development and differentiation, and cell transformation and growth. Authored by some of the foremost scientists in the field, each volume provides up-to-date information and directions for future research.

Praise for the Series

"Should be on the shelf of any biomedical library"

DOODY'S

"Maintains the tradition and set-up of the previous volumes and certainly provides up-to-date data on varied aspects of cell and molecular biology...a valuable acquisition to any library."

THE NUCLEUS

Contents include

- Defective Trafficking of Rhodopsin and its Role in Retinal Degenerations
- Adherens Junction Assembly and Function in the *Drosophila* Embryo
- New Insights into the Regulation of Myosin Light Chain Phosphorylation in Retinal Pigment Epithelial Cells
- Cell Biology of the Chloroplast Symbiosis in Sacoglossan Sea Slugs
- Regulation of Intraflagellar Transport and Ciliogenesis by Small G Proteins
- Emerging Roles for Renal Primary Cilia in Epithelial Repair
- Mechanisms of Cardiogenesis in Cardiovascular Progenitor Cells
- Membrane Trafficking and Phagosome Maturation during the Clearance of Apoptotic Cells
