

INTERNATIONAL REVIEW OF CELL AND MOLECULAR BIOLOGY

Volume 294

Edited by
KWANG W. JEON

University of Tennessee, Knoxville, TN, U.S.A.

International Review of Cell and Molecular Biology presents current advances and comprehensive reviews in cell and molecular biology—both plant and animal. Articles address structure and control of gene expression, nucleocytoplasmic interactions, control of cell development and differentiation, and cell transformation and growth. Authored by some of the foremost scientists in the field, each volume provides up-to-date information and directions for future research.

Praise for the Series

“Should be on the shelf of any biomedical library”

DOODY'S

“Maintains the tradition and set-up of the previous volumes and certainly provides up-to-date data on varied aspects of cell and molecular biology...a valuable acquisition to any library.”

THE NUCLEUS

Contents include

- Cellular Functions of Tissue Transglutaminase
- New Insights into the Regulation of Na^+ , K^+ – ATPase by Ouabain
- Ciliary and Flagellar Structure and Function – their Regulations by Posttranslational Modifications of Axonemal Tubulin
- New Insights into the Regulation of Epithelial-Mesenchymal Transition and Tissue Fibrosis
- Cellular and Molecular Biology of Optineurin
- Mechanism of Function of Viral Channel Proteins and Implications for Drug Development
