

INTERNATIONAL REVIEW OF CELL AND MOLECULAR BIOLOGY

Volume 295

Edited by
KWANG W. JEON

University of Tennessee, Knoxville, TN, U.S.A.

International Review of Cell and Molecular Biology presents current advances and comprehensive reviews in cell and molecular biology—both plant and animal. Articles address structure and control of gene expression, nucleocytoplasmic interactions, control of cell development and differentiation, and cell transformation and growth. Authored by some of the foremost scientists in the field, each volume provides up-to-date information and directions for future research.

Praise for the Series

“Should be on the shelf of any biomedical library”

DOODY’S

“Maintains the tradition and set-up of the previous volumes and certainly provides up-to-date data on varied aspects of cell and molecular biology...a valuable acquisition to any library.”

THE NUCLEUS

Contents include

- Allurin, an Amphibian Sperm Chemoattractant Having Implications for Mammalian Sperm Physiology
- New Insights into the Regulation of E-Cadherin Distribution by Endocytosis
- New Insights into the Role of the Cortical Cytoskeleton in Exocytosis from Neuroendocrine Cells
- New Insights into the Mechanisms for Photodynamic Therapy-Induced Cancer Cell Death
- New Insights into the Role of Angiogenin in Actin Polymerization
- Asymmetric Cell Divisions in the Epidermis
- New Insights into the Regulation of RNP Granule Assembly in Oocytes
- Role of Store-Operated Calcium Entry During Meiotic Progression and Fertilization of Mammalian Oocytes
