

INTERNATIONAL REVIEW OF CELL AND MOLECULAR BIOLOGY

Volume 297

Edited by
KWANG W. JEON

University of Tennessee, Knoxville, TN, U.S.A.

International Review of Cell and Molecular Biology presents current advances and comprehensive reviews in cell and molecular biology—both plant and animal. Articles address structure and control of gene expression, nucleocytoplasmic interactions, control of cell development and differentiation, and cell transformation and growth. Authored by some of the foremost scientists in the field, each volume provides up-to-date information and directions for future research.

Praise for the Series

“Should be on the shelf of any biomedical library”

DOODY'S

“Maintains the tradition and set-up of the previous volumes and certainly provides up-to-date data on varied aspects of cell and molecular biology...a valuable acquisition to any library.”

THE NUCLEUS

Contents include

- Synaptic Plasticity Regulated by Protein-Protein Interactions and Posttranslational Modifications
- Potential Use of G Protein-Coupled Receptor-Blocking Monoclonal Antibodies as Therapeutic Agents for Cancers
- Fibroblast Activation Protein- α : A Key Modulator of the Microenvironment in Multiple Pathologies
- Barx Homeobox Family in Muscle Development and Regeneration
- Role of Adrenomedullin in the Growth and Differentiation of Stem and Progenitor Cells
- Cell-Cycle Control in Oocytes and During Early Embryonic Cleavage Cycles in Ascidians
- Role of Major Sperm Protein (MSP) in the Protrusion and Retraction of *Ascaris* Sperm
- Role of Endoglin in Fibrosis and Scleroderma
